

Connected Property

London's Living Room, City Hall

4th March 2016

Property developers and landlords are an important sector that can help get superfast and ultrafast digital infrastructure deployed quickly and cost-effectively.

This seminar, hosted by INCA and the Greater London Authority will look at some of the key issues and developments including:

- The benefits of high speed connectivity
- London's Connectivity Charter
- Standardising wayleave agreements
- New building regulations for high speed networks
- How different providers are transforming digital connectivity for residents and businesses
